

# USDA AMS Weekly Shell Egg Demand Indicator

(Calculated estimate of demand for shell eggs based on current production and on inventory clearance rate.)

July 16, 2025

**The Shell Egg Demand Indicator for this week is -6.40, down 3.2 points from last week.**

## This Week:

Demand for shell eggs declined over the past week as active retail promotions expired. Wholesale prices for negotiated trading of loose caged eggs are higher on moderate to good demand for mostly light offerings. Supplies are light to moderate and trading is moderate to active. Wholesale prices for formula trading of carton stock are higher on moderate to good demand for mostly light offerings. Wholesale breaking stock prices are moving higher on a full range of demand for light offerings. Supply levels vary with full-time schedules and moderate trading. The preliminary survey of retail outlets indicates a sharp rise in shell egg features to the most active pace of the year to date. The average ad price declines sharply to the lowest level since the first week of the year and a level sure to drive consumer interest.
