MILK PRICE HIGHLIGHTS

Class I prices: Early September prices paid by dealers for milk used for fluid purposes (Class I) averaged \$7.11 per hundredweight for about 150 markets, according to the Crop Reporting Board. This was the same as August, but 19 cents above a year earlier. All regions showed gains over a year earlier, with increases ranging from 1 cent in the East South Central region to 27 cents in the East North Central.

Store milk prices: Store prices to consumers in 25 major cities in early September averaged 57.9 cents per half gallon for the most common grade of whole milk. This was down 0.1 cent from August but 0.3 cent above September 1970.

Home-delivered prices: Home-delivered milk averaged 67.4 cents per half gallon in September for 25 major cities. This was down 0.1 cent from August, but 2.6 cents above September a year earlier. Home-delivered prices represent list prices before deduction for quantity and other discounts.

SALES OF FLUID DAIRY PRODUCTS AND RECEIPTS
OF MILK FROM PRODUCERS

Preliminary July sales: Preliminary July data on sales of fluid dairy products in 63 marketing areas (58 Federal and 5 State) averaged 2 percent above a year earlier.

June sales: Revised June sales of fluid products in the 63 regulated markets averaged virtually the same as a year earlier.

Whole milk sales during June were down 3 percent from the 2.4 billion pounds in June 1970.

Low-fat and skim milk sales for June 1971 were up 10 percent from the year-earlier total of 682 million pounds.

Milk and cream mixtures sales (mostly half and half) were 10 percent below the 37 million pounds sold in June 1970.

Sweet and sour cream sales in June were 1 percent above a year earlier when 22 million pounds were sold.

Milk receipts: July receipts of milk from producers at plants regulated for 64 markets (60 Federal and 4 State) were up 4 percent from a year earlier. The number of producers delivering milk to plants for the same markets was down 1 percent from July 1970.

Milk production: U.S. milk production in August was estimated at 9.87 billion pounds, 1 percent more than a year earlier. August output provided 1.53 pounds of milk per person daily for all uses compared with 1.60 in July but was the same as a year earlier.

1/ Regional and U. S. average based on prices for individual markets weighted by population. Prices are f.o.b. cities within markets on a 3.5% fat basis. Prices for Federal-order markets include over-order payments above minimum Class I prices, reported by principal producers' associations. Over-order payments may not apply to all Class I milk. Prices in this table do not represent returns to producers. Blend prices paid to producers, based on proportions used in fluid and manufactured products, are shown by markets in Table 6.
