Direct Hay Weighted Average Report for week ending 4/16/2021

Volume			
	This Week	Last Reported (4/5/2021)	Last Year
Tons:			
Hay	4800	4000	0
Total	4800	4000	0

Please Note: The above volumes (tonnage, acres, and bales) listed on this USDA LPGMN report are for confirmed trades only, it does not include estimated volume (tonnage) for bids or offers to the trade.

Compared to last Friday, Old crop Alfalfa all grades steady in a light test. More new crop contracts being reported this week. Due to high winds in the trade area some grain farmers are being forced to replant as previous seeds got blown away or damaged. Few non-professional hay growers willing to contract at lower money than more seasoned growers are willing to accept. New crop contracts are straight thru rain or shine no test required.
