Prices Received by Farmers for Sheep and Lambs
United States and by States, monthly and annual
average prices, 1909-1961

This publication presents estimates of prices received by farmers for sheep and lambs, by States and for the United States, by months and years, 1909-1961. Regional prices are shown by months and years, 1924-61. Prices are on a live weight basis, and relate to all sheep and lambs sold by farmers, generally at the point of first sale. Mid-month prices published currently are based on reports of sales during the five days centered on the 15th. They are reviewed at the end of the year and revised, if necessary, to reflect sales for the month.

These estimates represent the average price received for sheep or lambs on an "as sold" basis, not the price of a specific grade at a common point of sale. They are used for computing value of production and income, for comparing price levels between States and price changes from month to month and from year to year, for measuring price trends, and for computing parity prices and index numbers of prices received by farmers. Monthly price data for sheep and lambs were not collected prior to 1910. In 1938, annual average State prices for 1909 were extrapolated on the basis of price changes at nearby central markets, primarily for use in computing farm income and index numbers. For a few States prices were interpolated for a few missing months on the same basis.

Annual average State prices were computed by weighting monthly State prices by the estimated proportion of annual sales each month. Regional and U.S. average monthly prices were computed by weighting monthly State prices by estimated annual sales. From 1910 to 1923, annual average prices for the U.S. were based on U.S. monthly prices weighted by monthly receipts at public stockyards. Since 1923, regional and U.S. annual average prices have been computed by weighting State annual average prices by estimates of annual sales.

Prepared by Ronald E. Johnson, Agricultural Statistician, under the general supervision of R. J. Schrimper, Head, Prices Received Section, and B. R. Stauber, Chief, Agricultural Price Statistics Branch, Agricultural Estimates Division, SRS. Primary data were provided by the State Statisticians' offices.
