Summary

Introduction: This bulletin presents final estimates, including revisions made by the Agricultural Statistics Board (ASB), for the production years 1998 through 2002. The number of turkeys raised, pounds produced, price per pound, and value of production, were published during calendar years 1998-2002 in periodic ASB reports. Data included in this publication provide a historic record and a benchmark for current estimates.

Procedures: Revisions were made after a thorough review of the original survey data and all additional data now available, including the 2002 Census of Agriculture. Revisions to turkeys raised at the National level are as follows:
