Direct Hay Weighted Average Report for week ending 7/23/2021

Volume			
	This Week	Last Reported (7/12/2021)	Last Year
Tons:			
Hay	1600	3525	8205
Straw	250	0	50
Total	1850	3525	8255
Bales:			
Hay	50	0	100
Total	50	0	100

Please Note: The above volumes (tonnage, acres, and bales) listed on this USDA LPGMN report are for confirmed trades only, it does not include estimated volume (tonnage) for bids or offers to the trade.

Compared to last week alfalfa and grass hay sold mostly steady. Ground and delivered forages and dehy alfalfa pellets steady. Demand backed off a tick this week as spotty rain showers across the state has taken some urgency from procuring hay. Most producers are done with second cutting of alfalfa. Meadow and grass hay in full production with many reports of tonnage equal to a little better than previous year. Most dryland fields of alfalfa should have a good 3rd cutting with the recent rains and hopefully future rains this summer. Most cornfields are in full tassel across the central to eastern areas.

Prices are dollars per ton and FOB they field or hay barn unless otherwise noted.
