Direct Hay Weighted Average Report for week ending 9/24/2021

Volume			
	This Week	Last Reported (9/13/2021)	Last Year
Tons:			
Hay	3970	2950	4415
Straw	450	0	0
Total	4420	2950	4415
Bales:			
Hay	150	0	0
Total	150	0	0

Please Note: The above volumes (tonnage, acres, and bales) listed on this USDA LPGMN report are for confirmed trades only, it does not include estimated volume (tonnage) for bids or offers to the trade.

Compared to last week all reported hay sales sold steady. Most contacts reported not as many calls this week compared to previous weeks. There has been some rain in surrounding states that has taken some buyer inquires off the market for the time being. Also, many prospective buyers are busy with harvest and will access their hay needs after that is complete. First frost of the season was Wednesday morning and reported out of the Alliance area contacts as they stated it was hard on the cane and millet. The hay didn't look too damaged as many will try to take a fourth cutting of alfalfa. Farmers continue to be in the fields, combining soybeans, high moisture, and dry corn. Some are getting cornstalks baled. Many reports there will be a large number of cornstalks and bean stubble baled this fall with weather permitting.

Prices are dollars per ton and FOB they field or hay barn unless otherwise noted.
