Direct Hay Weighted Average Report for week ending 2/26/2021

	Volume		
	This Week	Last Reported (2/15/2021)	Last Year
Tons:			
Hay	3035	1520	0
Total	3035	1520	0

Please Note: The above volumes (tonnage, acres, and bales) listed on this USDA LPGMN report are for confirmed trades only, it does not include estimated volume (tonnage) for bids or offers to the trade.

Compared to last week alfalfa and grass hay sold fully steady. Ground and delivered hay and alfalfa pellets steady. Demand was good for all types of bale hay. Producers have fed a lot more hay the last two to three weeks than they had planned on due to the bitter cold and snow-covered grazing fields. Quite a few calls coming through the market news office wondering where they can procure additional loads of mostly alfalfa bales. Most contacts stated they had similar conversations. Most people who are trying to buy hay, are looking for haying needs in the next 60 days or until first cutting arrives.

Prices are dollars per ton and FOB they field or hay barn unless otherwise noted.
