Direct Hay Weighted Average Report for week ending 3/5/2021

Volume			
	This Week	Last Reported (2/22/2021)	Last Year
Tons:			
Hay	1660	3035	0
Total	1660	3035	0
Bales:			
Hay	20	0	0
Total	20	0	0

Please Note: The above volumes (tonnage, acres, and bales) listed on this USDA LPGMN report are for confirmed trades only, it does not include estimated volume (tonnage) for bids or offers to the trade.

Compared to last week alfalfa sold fully steady to 5.00 higher. Ground and delivered cornstalks steady to 10.00 higher. Ground and delivered alfalfa and grass/meadow hay sold steady. All contacts stated the phones have been busy this week Especially, for alfalfa hay. Some contacts said prospective buyers are looking for some large quantities of dairy and lesser quality hay. Some talk of producers are going to bale cornstalks when fields get dried out. Bulk of the snow has melted and ran off or some may have soaked into the topsoil. But, overall moisture is still down for the year and we all know the best time for a drought is in the winter. As spring begins in a couple of weeks, hopefully the old saying April showers brings May flowers comes through.

Prices are dollars per ton and FOB they field or hay barn unless otherwise noted.
