Direct Hay Weighted Average Report for week ending 5/7/2021

	Volume		
	This Week	Last Reported (4/26/2021)	Last Year
Tons:			
Hay	425	1445	0
Total	425	1445	0

Please Note: The above volumes (tonnage, acres, and bales) listed on this USDA LPGMN report are for confirmed trades only, it does not include estimated volume (tonnage) for bids or offers to the trade.

Compared to last week all reported forages sold steady on a thin test. Demand remains good for this time of year for all baled products. Drought continues to linger on in the western half of the state and is making most wonder if they will have enough summer grass for their livestock. Some of these cattlemen continue to search for baled hay just in case they need to supplement their herd. High corn market forecast on the CBOT (Chicago Board of Trade) is taking some acres of alfalfa out of production as roundup ready corn is getting planted. This could add tightness to an already short forage market in a large area. Some areas of the state received rain, with hail and wind as some areas remain dry. Per NASS; Corn planted was 42%, behind 55% last year, but ahead of 36% for the five-year average. Emerged was 2%, behind 8% last year, and near 5% average. Soybeans planted was 20%, behind 29% last year, but ahead of 12% average. Pasture and Range Report: Pasture and range conditions rated 6% very poor, 16% poor, 37% fair, 37% good, and 4% excellent.

Prices are dollars per ton and FOB they field or hay barn unless otherwise noted.

Alfalfa Quality Guidelines

Quality	ADF	NDF	*RFV/RFQ	**TDN-100%	**TDN-90%	CP
Supreme	<27	<34	>185	>62	>55.9	>22
Premium	27-29	34-36	170-185	60.5-62	54.5-55.9	20-22
Good	29-32	36-40	150-170	58-60	52.5-54.5	18-20
Fair	32-35	40-44	130-150	56-58	50.5-52.5	16-18
Utility	>35	>44	<130	<56	<50.5	<16

*RFV calculated using the Wis/Minn formula. **TDN calculated using the Western formula. Quantitative factors are approximate, and many factors can affect feeding value. Values based on 100% dry matter (TDN showing both 100% & 90%). Guidelines are to be used with visual appearance and intent of sale (usage).

Grass Hay guidelines

Quality	Crude Protein Percent
Premium	Over 13
Good	9-13
Fair	5-9
Low	Under 5
