

Stocks of Grains in All Positions

U. S. DEPARTMENT OF AGRICULTURE
AGRICULTURAL MARKETING SERVICE
CROP REPORTING BOARD

Release: 3:00 P. M. (E. D. T.)

July 22, 1955

STOCKS OF GRAINS JULY 1, 1955 WITH COMPARISONS

The Crop Reporting Board has assembled from various sources the following information on stocks of grain in all positions:

Grain	Position	July 1 1953	July 1 1954	April 1 1955	July 1 1955
----- Thousand bushels -----					
Wheat	(On Farms <u>1/</u>)	73,105	59,038	207,920	38,241
	(Terminals <u>2/</u>)	239,330	296,715	351,913	380,409

	TOTAL		6/	6/	6/

- 1/ Estimates of the Crop Reporting Board.
 2/ Commercial stocks reported by Grain Division, AMS, at 44 Terminal cities.
 3/ Owned by CCC and stored in bins or other storages owned or controlled by CCC, also CCC-owned grain in transit to ports; other CCC-owned grain is included in the estimates by positions.
 4/ Mills reporting to the Bureau of the Census, on millings and stocks of flour.
 5/ All off-farm storages not otherwise designated for each grain.
 6/ Not available for April 1 nor July 1.

WHEAT CARRY-OVER AND JULY 1 CORN STOCKS RECORD HIGH

Wheat stocks of 1,020 million bushels, as reported in all storage positions July 1, 1955, were 13 percent larger than the previous record for the date. Corn stocks of 1,577 million bushels exceeded the previous high total for July 1 by 170 million bushels. Carryovers of oats and barley were also larger than a year earlier, being 35 and 82 percent larger, respectively. The tonnage of feed grains was nearly 17 percent larger than a year ago and largest for July 1 in the 13 years for which comparable data are available. These totals are assembled from various sources and include stocks at terminals, as reported by the Grain Division of the Agricultural Marketing Service; grains reported by Commodity Credit Corporation and Commodity Stabilization Service as owned and stored in bins and other storages under control of CCC and in transit; and estimates of the Crop Reporting Board for stocks on farms, at merchant mills, and interior mills, elevators, and warehouses.

Stocks of over 1,020 million bushels of old wheat stored in all positions on July 1, 1955, are the largest of record for that date and compare with the previous high of 902 million bushels on July 1, 1954. Some uncertainty surrounds the current stocks total, largely because at the time surveys were underway quantities of unknown magnitude were in the process of being moved from under Government price support on farms and in county elevators to Commodity Credit Corporation ownership and storages.

Carryover stocks of old wheat on farms July 1 were about 38 million bushels, the smallest since 1937 and 61 percent less than a year earlier. Old wheat stocks in all off-farm storages -- 982 million bushels -- were the largest off-farm carryover of record. They exceed the 803 million bushel stocks a year earlier, the previous record total, by 178 million bushels or 22 percent.

The 16.1 million bushels of old rye stored in all positions on July 1 is the largest carryover since 1944, and compares with 14.9 million bushels on July 1, 1954, and 6.3 million bushels on July 1, 1953. Current stocks are considerably smaller, however, than carryover in the years prior to 1945 when production was larger. Of the total stocks, more than a fifth was stored on farms. Stocks of rye in bins and warehouses under Government control and in transit on July 1 totaled more than $1\frac{1}{2}$ million bushels. Rye held in all other off-farm storage totaled 4.3 million bushels which compares with 2.7 million bushels in similar positions on July 1, 1954.

Stocks of corn in all storage positions on July 1 are estimated at a record high level of 1,577 million bushels compared with 1,407 million bushels a year ago. While stocks on farms at 938 million bushels were about 52 million less than a year earlier, there was an increase of 158 million bushels in CCC storage in their own bins or in transit. Stocks in commercial elevators and terminals were also far above July 1 a year ago. Disappearance of corn from all positions was 538 million bushels from April 1 to July 1 compared with 586 million bushels during the same quarter last year.

(Continued on page 6)

* Unallocated - to avoid disclosing individual operations.
 1/Includes stocks at Interior Mills, Elevators and Warehouses, commercial stocks reported by Grain Division, AMS, at terminals, and those owned by Commodity Credit Corporation which are in transit to ports, in bins and other storages under C.C.C. control.
 2/Off-farm total plus farm stocks.

(Continued from page 2)

Oats carryover, totaling 315 million bushels in all positions, was more than one-third larger than on July 1 a year ago and the largest of record for this date. About 65 million bushels were in off-farm positions -- more than double a year ago -- with largest increases percentagewise in CCC and terminal holdings. The carryover of barley at 150 million bushels exceeded the July 1, 1954, total by 82 percent, and the 10-year average by 76 percent. An unusually large portion of barley stocks was held in off-farm positions this year.

For sorghum grain, stocks are available on July 1 for only the off-farm positions. These stocks, at 93 million bushels, are about 3 times last year's holdings and by far the largest of record. Stocks of CCC-owned sorghum grain in their own storage are down sharply from last year, but terminal stocks are more than 5½ times as large, and holdings in interior mills, elevators, and warehouses are three times as large as last year.

STOCKS OF WHEAT BY CLASSES

Stocks of old wheat at interior mills, elevators, and warehouses, together with stocks on farms July 1, 1955, totaled about 437 million bushels. This was only slightly more than the 431 million bushels in the same positions a year earlier and more than 3 times the average for the date.

Distribution of these combined stocks by classes is shown in the table below. This distribution is not based on current survey or enumerative data, but largely upon the assumption that stocks by classes in the various producing areas tend to remain in about the same proportion as production in those areas.

WHEAT: Stocks by Classes--Total on Farms and at Interior Mills, Elevators, and Warehouses on July 1

Class	: 10 yr. av. : : 1944-53 :	: 1954 :	: 1955 :
