Release: 3:00 P.M. (E.S.T.)

January 21, 1955

## STOCKS OF GRAINS JANUARY 1, 1955, WITH COMPARISONS

The Crop Reporting Board of the Agricultural Marketing Service has assembled from various sources the following information on stocks of grain in all positions:

Grain	Position	Jan. 1	Jan. 1	Oct. 1	Jan. 1
		1953	1954	1954	1955
Thousand bushels					
Wheat	(On Farms <u>1/</u> )	401,110	423,068	429,474	315,689
	(Terminals <u>2/</u> )	259,257	316,765	422,772	374,369
	(Commodity Credit Corp. <u>3/</u> )	4,655	44,674	126,228	131,366
	(Merchant Mills <u>1/</u> <u>4/</u> )	128,199	123,467	158,981	145,122
	(Int. Mills, Elev. & Whses. <u>1/5/</u> )	312,694	424,292	539,152	493,700

	TOTAL	54,085	79,196	22,021	189,013

1/ Estimates of the Crop Reporting Board

2/ Commercial stocks reported by Grain Division, AMS, at 44 Terminal cities,

3/ Owned by CCC and stored in bins, ships, or other storages owned or controlled by CCC, also CCC-owned grain in transit to ports; other CCC-owned grain is included in the estimates by positions,

4/ Mills reporting to the Bureau of the Census, on millings and stocks of flour,

5/ All off-farm storages not otherwise designated for each grain.

## RECORD TONNAGE OF GRAINS IN STORAGE

Largest January 1 stocks of corn, wheat and barley, second-largest for oats and sorghum grain, and for rye the largest stocks in 10 years, are reported in all storage positions on January 1, 1955. These add up to records on this date for the tonnage of feed grains, for reserves of food grains and by a large margin for the total of the 6 grains in storage—over 151 million tons. These data were assembled by the Crop Reporting Board, bringing together commercial stocks at terminals, as reported by the Grain Division of the Agricultural Marketing Service; grains reported by Commodity Credit Corporation as owned and stored in their own bins, aboard ships, and in other storages under control of CCC and in transit to ports; also estimates of the Crop Reporting Board for stocks on farms, at merchant mills and at interior mills, elevators and warehouses.

Corn stocks of 2.8 billion bushels in all storage positions on January 1 are the largest of record, topping by about 4 percent those of a year earlier and the previous record on January 1, 1950. Farm stocks of 2,070 million bushels are only a little above average for the date. But the off-farm portion is much larger than in any previous year, chiefly because of the 516 million bushels owned and stored in their own storages by Commodity Credit Corporation. The 60 million bushels of commercial stocks at terminals has been exceeded only 3 times in the 29 years of record. Nearly 153 million bushels at interior mills, elevators and warehouses are by far the largest holdings of corn ever stored in that position, over 50 percent more than in each of the last two years. From the October 1, 1954 supply of 3,572 million bushels of grain corn, disappearance is indicated at only 773 million bushels. This is considerably less than in any October-December quarter in the other 11 years of record, when disappearance ranged from 857 to 1,076 million bushels. It is offset somewhat by relatively heavy disappearance of other feed grain.

Stocks of 1,460 million bushels of wheat stored in all positions on January 1, 1955 are the largest for that date in the comparable series beginning in 1935. This total is nearly a tenth larger than a year earlier, the previous record holdings for January 1. Current stocks are less than October 1, 1954 stocks by 216 million bushels or 13 percent.

Off-farm stocks of 1,145 million bushels, one-fourth larger than a year earlier, are a record total for the date, with holdings in each of the off-farm positions at a record level. Of this total, about five-sixths was either owned by the Commodity Credit Corporation or was warehouse-stored wheat under Government commodity loans. Stocks of wheat on farms, at 316 million bushels, were the smallest January 1 farm stocks since 1941. About three-eighths of the total wheat on farms was under Government commodity loans.

The off-farm total includes 145 million bushels at merchant mills, 494 million bushels in interior mills, elevators and warehouses and 374 million bushels commercial stocks at terminals, each about one-sixth

larger than a year earlier. The Commodity Credit Corporation had 131 million bushels of wheat, a record total, stored in bins under CCC control, aboard ships in the "Mothball" fleet, and in transit to ports. Other Government owned wheat is included in the estimate for the position where stored.

The 25,4 million bushels of rye stored in all positions on January 1, 1955 is the most for the date in 10 years and exceeds the relatively large stocks held on January 1 a year earlier by 18 percent. Of this total, nearly 9 million bushels or 35 percent is stored on farms. Approximately two-fifths of the farm stored rye is under Government commodity loans. Stocks of rye in bins under Commodity Credit Corporation's control on January 1 totaled 1.7 million bushels. Rye held in all other off-farm storage totaled 14.7 million bushels, which compares with 14.9 million held in similar positions on January 1, 1954.

Oats stocks of 1,016 million bushels on January 1, 1955 were over a fifth larger than a year ago and were exceeded on January 1 only in 1946. Farm stocks of 923 million bushels also were exceeded on this date only in 1946. The record large off-farm stocks of about 94 million bushels consisted of record large holdings in interior mills, elevators and warehouses and in CCC bins, while about the usual holdings were reported at terminals. Disappearance of oats since October 1, amounting to about 280 million bushels, was somewhat more than usual.

Barley stocks of nearly 284 million bushels in all positions were the largest of record and were 59 percent larger than holdings on this date a year ago. Stocks of 166 million bushels on farms were the largest since 1943, while record large holdings were reported at interior mills, elevators and warehouses, and in CCC bins. Stocks at terminal points were the largest since 1951. Disappearance of 72 million bushels in the October-December quarter was much larger than usual.

For sorghum grains, stocks of 189 million bushels in all positions were nearly  $2\frac{1}{2}$  times as large as a year ago and were exceeded only on January 1, 1951. Record large holdings of 40.6 million bushels were reported at terminals, while the 1.3 million bushels stored in CCC bins was largest since 1951. Farm stocks of 51.8 million bushels were slightly below average, but the 95.3 million bushels at interior mills, elevators, and warehouses were exceeded only by 1951.
